

LIMITED COSTS.  
INFINITE POSSIBILITIES.

elements

You're an **idea person**. You know a good one when you see it, because you've had more than a few good ideas of your own.

You want a display system that won't stifle your **creativity**, that will give you the **building blocks** you need to design and execute **your next great exhibit idea**. And you need to do it all without backbreaking effort, or breaking the bank.

## DREAM IT, SEE IT

**Elements** is the portable exhibit system from Displayit that lets you turn your display dreams into reality.

Displayit's **Elements** offers **near-endless combinations** of display component options with **few restrictions on shape or scale**.

THIS'LL BE YOUR  
**FUNNEST**  
EXHIBIT YET

# THE FUNDAMENTAL ELEMENTS STRENGTHS

## + Versatile

+ When your exhibit needs don't fit the standard "solution," the **Elements** system lets you **create something new just for you.**

**Elements** uses interlocking aluminum poles to create **freestanding frames.** We **print your custom graphics** on tension fabric that fits over the frame.

Our framing system allows us to create individual panel widths from 3'-4" to over 18 feet, with panel heights up to 8 feet. We "bend" the frames to **create various shapes** using **angles and curves along 3 dimensions.** Special feet allow interconnection of multiple panels so you can enjoy **virtually any geometry or length.**

A system like **Elements** isn't just Versatile. It's Expandable. Configurable. Scalable. Customizable. Adaptable. Modular. Integrated. It may be the only portable display system capable of supporting your great exhibit ideas.

## + Expressive

+ Maybe you're the type who **didn't need directions to enjoy Legos®, Lincoln Logs®, or an Erector® set.** Eight crayons is never enough for you; you find it easy to use 64.

Now it's time to create a standout exhibit to **colorfully communicate your organization's important messaging.**

Words and images aren't enough. You want varied shapes and geometry to **create a unique, multi-dimensional exhibit** that communicates with personality.

When you're ready to make a statement, **Elements** is the display system that lets you **bring your unique exhibit plans to life.**

## + Practical

+ **Elements** lets you create the **upscale look** you're after while allowing you to keep your feet on the ground.

Set-up of your display will always be **quick and easy,** thanks to **tool-free assembly.** The tension fabric and aluminum frame components are **lightweight** and **compact** for painless shipping and storage. You'll find it all quite **affordable,** allowing you to enjoy mid-line quality and impact with **unbeatable cost-effectiveness.**

When you use **Elements,** your "crazy" exhibit idea suddenly makes good sense.

Legos®, Lincoln Logs®, and Erector® set are registered trademarks of their respective owners.
